Learning the scale of opening with $t = 100.0$ and the starting scale being 150.0.

Legend:
- f
- $f \boxplus q^t$
- $f \boxplus q^s$ on i = 10
- $f \boxplus q^s$ on i = 50
- $f \boxplus q^s$ on i = 100
- $f \boxplus q^s$ on i = 150
- $f \boxplus q^s$ on i = 500
